CITY GAINS

In Case Involving Possession of \$1,200

POLICE FUNDS

Bank Will Not Give Fund to the Court.

The famous case of the Rock Island Limber and Manufacturing company against S. E. Jocelyn and the Fourth National bank, Involving the question whether over \$1,300 on deposit in the bank belongs to the city of Wichita or S. E. Jocelyn, came before Judge Mathew Simpson, in the district court at Newton, yesterday, and resulted in a victory for the city. Though the court has not yet decided whether the funds shall be paid by the bank into the city treasury, as that question will be decided next May, the court did decide yesterday that the bank should not turn the funds over to the district court, as desired by the plain-

If will be remembered that Mr. Joce-lyn was indebted to the Rock Island Lumber and Manufacturing company for humber used and the company ob-tideed a judgment against him for about \$1.00. The company also ran a garni-shment upon the bank to hold the funds of the police department, deposited in the name of Mr. Joedyn, to pay

As Judge Dale had been an attorney in the case before being elected to the bench, the case was heard before Judge Simpson, at Newton, in 1885. The court feeled that the mousy did not bel ar to Mr. Joselyn and discharged the bank as garnishes. The plaintiff appealed the case to the supreme court and about three months ago the higher court hand-ed down a decision revening the opinion of the lower court, holding that under the pleadings in the case the court committed error in discharging the garnishes, or the grounds that the mency was deposit-ed in Jossyn's name and the bank had ignored this fact in its answer to the auft. The higher court for the same reason decisies that the city was not en-stilled to the money and remanded the case lack to the district court.

former interplea and set up all the facts garmishes to comply with the require-ments indicated in the opinion of the supreme court. Two of the old board of pulles commissioners filed a motion ask-ing that tasy be allowed to interptend. and claiming the money as public funds belonging to the board. The lamber with the result that the court overrolled the motion of the pinintiff to turn the mours into the hands of the court, and also refused to receive judgment in favor

beard. The other members of the bound up, and yesterday he was resting earlier.

The may term of court, when the right of the police board to the funds will be a THOUSAND DOLLAR of the interplex filed by at the right of the police board to the funds will be a the right.

Insued for police purposess.

The interples also states that when the police board was abeliefed, it turned ever all the property it had to the officers of the city and different the Fourit National bank to turn over the maneys of the learnt which it held, into the hands of the rity treatment.

the city treasurer.
Mr. Spencer and Mr. Furnish closes in interpres by asking that the murray turned into the hands of the city, or

BIG ELEVATOR COMING SURE

Wichita People Taking Hold of Matter in Earnest.

ARE ASSURED PROFITS

Mr. Howard and Others Outline Prospects.

It is about settled that Wichlia is going o have a half million bushel grain elevator. It is believed that in addition to be ing important to the business interests of El Paso. the city it will be a very profitable inestment for the men who are putting their money in the enterprise.

Mr. Nevling is a practical grain man and he has shown his faith in the favorable location of Wichita for a big elevator by putting his own money in it. He has one of the best new elevators west of the Mississippi river and when the steel tanks are added to increase the storage capacity to the desired extent it will be one of the best paying properties in

Stock yards are a snap where there is took to handle, and next to them is an elevator at a point where there is grain to handle. Ofuside money is offered to help along the enterprise, but Mr. Nevling desires to have the majority of stock held here so that the directors can be kept in the city near the elevator. Quite a number of wealthy farmers have told Mr. Nevling that they desired to have come money invested in the elevator so that it will be owned by home capital.

If the elevator had been enlarged and ished before the last harvest, millers speculators would have made money enough after paying attrage to have bought the elevator. Wheat receipts on such an elevator are splendld securities in bank. They are better than cattle paper or almost anything else except govern-ment bonds, because the banks know the wheat is behind the receipts and wheat s always cash at the market price. If here is any question about it to the bankr he can go to the elevator and see that

the wheat is there.
The grain men in this city have been talking elevators for a long time and they have pointed out that about three years out of five an elevator of this kind would pay for itself in storage fees. One year perhaps it would be in wheat, another in orf and then in oats. People who buy grain to held generally make money on it, but whether they do or not the elevator

empany always gets its storage.

When the success of this elevator has
seen demonstrated to the satisfaction of everybody people who have no stock in it will want some of the stock for an investment and when they cannot get it other elevators will be built because the grain is here and it will continue to be here and Wichita will become a great market for million wheat and that will below for milling wheat and that will bring

more mills.
Some of the live business men of this city are able to see the certain success of this elevator movement and they have gotten in on the ground floor. There are my nose. My nose was also broken by the actual grain instead of buying wind and put up his receipts and margin in the Mrs. Grimes heard the noise caused by banks of this city. The millers will come

would amount to 300,000,000 pounds per year and as I notice attention was called to the tonnage furnished by the stock yards and packing houses which amounted to, in the past year, 155,000,000 sounds, you can readily see that the slevator would furnish almost double the onnage of your packing houses and

"If thirty-three per cent seems beyond expectation, say one-half of it, by figuring less tonnage used or less wheat mundicd in and out per day or less days operated within the year. If this seems operated within the year. If this seems still too large profits to reasonably expect, divide it again and you still have eight per cent on the investment. These figures of thirty-three per cent profit are not excessive or beyond that often realized on such investments, but for the sake of absolute safety, one can be reasonably certain of at least twenty or twenty-five per cent profit on the investment.

"I. E. HOWARL."

ON CALIFORNIA LINE Mail Contracts May Compel Santa Fe

to Build Short-Cut. The longest rallway mail route in America will be in the Wichita division ofter March 4. It will be 60 miles long and will extend from Herrington to

At the chief clerk's headquarters in this city they are as busy as if they were proparing for war arranging the details of the new service. Within five days they must have a full complement of clerks and complete equipment for the

On March 4, the quadrenial weighing of mail will begin thirty days ahead of the usual time, and the Rock Island, which aspires to carry the California mail, wants to take the business away from wants to tale the business away from the Santa Fe, which is doing it now. The Rock Island people say they can best the Santa Fe to Ei Pase, over their new line south of Liberal, six hours, and make connection there with the Southern Fathe fer Los Angeles. Six hours is a big thing in the dispetch of mails and the government will give them a big con-

government will give them a big con-tract if they can do it.

The mail to be handled will be enor-mous, but as the local service will be light, owing to the read running through a sparsely settled country, the Canfor-nia mail can be distributed on route, so that a great deal of it med not be re-handled by the Southern Pacific restal clerks.

This will be convenient for the govern-ment, as well as better for the Califor-nia patrons of the postal department. It is thought here that the quantity of the contract will compet the Santa Fe to shorten its line by building from Amarillo, Texas, to Los Lamas, New Mexico, in which event, its main line and California business will be by way of two yearlings last fall, by a son of Elements.

It is said that the change of running time on the Rock Island, beginning Sunand a half earlier in the morning.
